

# Install VMware Tools on CentOS 5.9 – Es. Elastix 2.4

## 1. Mount from media :

```
[root@centos59 ~]# mount /dev/cdrom /mnt
mount: block device /dev/cdrom is write-protected, mounting read-only
```

## 2. Got to /mnt :

```
[root@centos59 ~]# cd /mnt
[root@centos59 mnt]# ls
manifest.txt  VMwareTools-9.2.2-893683.tar.gz
```

## 3. Copy VMwareTools from /mnt to /tmp :

```
[root@centos59 mnt]# cp VMwareTools-9.2.2-893683.tar.gz /tmp
```

## 4. Extract the VMwareTools :

```
[root@centos59 mnt]# cd /tmp
[root@centos59 tmp]# tar xzvf VMwareTools-9.2.2-893683.tar.gz
[root@centos59 tmp]# cd vmware-tools-distrib
```

## 5. Start installing VMwareTools :

```
[root@centos59 vmware-tools-distrib]# ./vmware-install.pl
```
